5050 Waterproof Flexible LED Strips - 5050 Waterproof Flexible LED Ribbon Light in White and RGB

30 LED Per Meter and 60 LED per meter

Premium quality, waterproof flexible strip is available in daylight white, warm white, or RGB color changing.

Daylight White and Warm White flexible LED strips shown lit. Due to web rendering, color may not be exact. Comes with one connector attached to one end of the reel and 8 mounting clips. Available in standard 30LPM and double density 60 LPM reels.

Common Specifications | 30 LPM Specifics | 60 LPM Specifics

- First quality; no cheap component substitutes
- Dimensions: 12mm wide by 4mm tall by 5 meters long. Approximately 16' per reel.
- Sold by the full reel only.
- LEDS: 120 degree view angle, 5500-6500K Daylight White; 3000-3500K Warm White; RGB: Red 600-630nM; Green 500-530nM; Blue 600-610nM
- IP Rating: IP64. Waterproof but not submersible
- Operating Voltage: 12VDC.
- Requires a transformer, not included. RGB flexible LED strip also requires a color controller, not included.
- Optimum Working Temperature: -10° to 50 ° C (14° to 122° F)
- Warranty: 2 years
- Download cut sheet

RGB Flexible LED strip has a four wire connection: red, green, blue and common. White flexible LED strip has a two wire connection. Couplers are for connecting two pieces close together. There are two types of connectors: the EZ snap connectors or our Pro Grade connectors. With a smaller footprint, the Pro Grade are easier to work with inside the waterproof sleeve. Single connectors, double connectors and couplers are available in both EZ snap versions and Pro Grade.

The best method of connecting waterproof runs is to solder your leads. If you cannot do that, instructions for using connectors with shrink tube are here.

You receive 8 mounting clips and one attached connector with each reel. You do not need anything else if you do not intend to make field cuts. If you are going to cut, you will find end caps, mounting clips and silicone sealant below.

I just got my led lights and I did not get a diagram on how to hook them up I don't want to short them out. if any one can tell me how to hook them up to my street bike I have a96 zx9r

★★★★★ **Great lights**

Cameron Walker from Apple Valley, CA

I ordered 2 of the 9.5" and 2 of the 4.7" strips. Wow. I was surprised at the amount of light the 9.5" strips put out. I used them in the footwells of my Jeep Cherokee. The 4.7" strips however, I overestimated them. They're bright, but not bright enough for the back floorboard to light up. Had them about 2 weeks and no problems so far. The leads could be thicker though. It's hard to find butt connectors that will hold the wire tight.

First Solar Power Plant Online in Jordan

The first solar power plant in Jordan have completed and connected to the grid at the Aqaba facility, it is owned by Seci Energia (Gruppo Industriale Maccaferri),one of Europe's most active solar developers and Desert Technologies,

Named "Shamsuna," the installation is part of a rolling program which includes 12 projects – run by the Jordanian Ministry of Energy and Mineral Resources (MEMR) – which provide a 20-year agreement for the sale of electricity to the local company NEPCO (National Electric Power Company) at a special rate of 0.12 JOD/kWh, equivalent to US$0.17/kWh
